PROFESSIONAL PROFILE

Full-stack web developer w/ several years of commercial experience in web development and online games industry. Have been programming since very young age (first computer having been a Sinclair ZX Spectrum, in 1983, at the age of six years old). Passionate about back-end: PHP (Laravel, Symfony, Zend). Very knowledgeable about Modern OOP, Design Patterns (Singleton, Observer, etc.), TDD/BDD (PHPUnit, Selenium, Codeception, Cucumber, etc.), AngularJS SPAs, MySQL (Database design and normalization, phpMyAdmin, etc.), ORMs (Eloquent/Doctrine), CSS3 Grid, Media queries and Flexbox, Restful API's and MailChimp.

OBJECTIVE

Securing a very prospective permanent position as a Modern OOP PHP programmer, passionate about Laravel and Symfony, settling with a very stable income, in finance or in a well established lucrative company where I can achieve my whole potential and be a great game changing professional.

Salary expectation

> £35-£38k

CORE COMPETENCIES

- Modern OOP PHP and JavaScript: *JQuery, AngularJS, AJAX, SASS*
- Test/Behaviour-Driven Development: *Eclipse/PDT Debugger Plug-in | PHPUnit | Selenium | Codeception | Cucumber*
- MVC Frameworks: *Laravel, Symfony, Zend, Codeigniter*
- *Git and SVN | MySQL | UNIX/Linux | HTML5 and CSS3 | Adobe Flash, AS2/3, Flex and Silverlight*
- Programming Languages: *Core Java™ SE | C# | Perl | Bash | Pascal | Python | C++ | Arduino and NI LabVIEW | R programming language | Wolfram Language™*
- Microsoft Office Suite and Adobe products

CAREER SUMMARY

2013 - Present *Web Developer and IT Specialist*

- Offering life-cycle project support for large and small-scale web and software developments across industries
- Assessing user-requirements to provide interventions which meet business needs without exceeding capability, considering: costs, time horizons, organisational goals and regulatory obligations
- Communicating with clarity and respect, delivering excellent customer service

2013 *Web Developer, Rocabee Ltd.*

- Innovated games, websites and platforms, working alongside a design and coding team
- Honed technical knowledge and the practical application of PHP, jQuery, AJAX, HTML, CSS

2012-2013 *Web Developer -Internship, VEOO Ltd.*

- Delivered holistic PHP development using ZF2 and RESTful web services to improve applications

- Fully accountable for SMART website development including: accurate coding, application security, and aesthetic enhancement

2008 *Web Developer, ASOS.com*

- Drove brand engagement and profitable growth for the UK's largest online-only fashion retailer, through Flash CS3 actionscript development, animations and PHP back-end integration
- Focused on delivering robust User Interfacing (UI), including cross-browser compatibility and general web functions.

2007 *Online Gambling Software Developer, Generius Ltd*

- Integrated XML into Flash component parsing through CVS tortoise
- Collaborated with interdisciplinary professionals to enhance and create games for UK gambling brokers
- Motivated colleagues to meet tight deadlines and effectively maintain the vast game repository/platform
- Promoted service offering through Flash Media Animations scripting, integrated video streaming and broadcasting through Java Virtual Machine (JVM)

2006 *Freelance Web Developer & IT Consultant*
